CPR/AED FOR THE PROFESSIONAL RESCUER Our CPR/AED for the Professional Rescuer class is held on Long Island NY, this includes Nassau and Suffolk County NY. This class is taught by New York State Department Of Health approved instructors. Emergency rescuers like you may have been hoping to become CPR and AED certified.

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Designed for those with a duty to act, this course helps participants respond to breathing and cardiac emergencies in adults, children and infants. This handbook covers: Primary Assessment, Ventilations (includes BVM), Choking (conscious and unconscious, CPR (one- and two-rescuer), AED, and More. From back cover.

For use in the CPR/AED for Professional Rescuers and Health Care Providers course, this handbook offers participants the knowledge and skills needed to respond to breathing and cardiac emergencies in adults, children and infants until more advanced medical personnel takes over. Topics include performing a primary assessment, giving ventilations (includes BVM), choking (includes conscious and unconscious), CPR (includes one- and two-rescuer) and AED. The handbook incorporates the latest science and skill sheets depicting step-by-step lifesaving skills for quick reference.
