body alone that was left, even as she went beyond the body.' Journeys form the leitmotif of these astonishing new stories by Ambai. Sometimes culminating in an unconventional love affair, some are extraordinary tales of loyalty and integrity; others touch on the almost fantastic, absurd aspect of Mumbai. Yet others explore the notion of a wholesome self, and its tragic absence at times. These stories are illuminated by vivid and unusual characters: from an eccentric, penurious singer-couple who adopt an ape as their son, to a male prostitute, who is battered by bimbos for not giving 'full' satisfaction. Crucially, some of the stories, like the title one, engage uninhibitedly with a woman's

relationship to her body. For Ambai, feminist par excellence, the sensual body, experienced as a natural landscape changing with age, is at the same time, the only vehicle of life and tool for mapping the external world.

"The IT industry, to the outside world, looks to be the epitome of all good things in life. That is the place where the super intelligent youth of India go to work. This is the story of such an 'exceptional' software firm—the

Infopro Limited. None of the keywords from the above paragraph— 'fat paycheck', 'beautiful campuses', 'beautiful colleagues', 'super intelligent folks' —apply to Infopro. In fact, the Infopro employees who utter such nonsense words as these may even risk losing their jobs! Beware, apart from producing 'software programs', this 'software factory' produces intense laughing gas too as a by-product! If you are allergic to 'laughing gas', please stay away from this book! And, if you are from the IT industry, pick 2 copies and gift one to that never-smiling, arrogant boss of yours and see the instant, positive change in him and, more importantly, be assured of a better appraisal next time round!"

India is mutating – and its Science Fiction with it. *Star Warriors of the Modern Raj* is a critical catalogue of contemporary India's anglophone SF, a path-breaking work that flits between texts, vantage points and frameworks. An alternative to a Eurocentric perspective of SF, this study avoids essentialising definitions and delves into how the world of SF (text) intersects with that of the writer/reader. Fusing

Online Library Domechild Shiv Ramdas

paradigms of Science Fiction Studies, South Asian Studies and Postcolonial Studies, among others, the book explicates how India and its SF negotiate one another. It evolves a 'transMIT thesis' to analyse how mythology (M), ideology (I) and technology (T) contour Indian SF and its fictional reimaginations. This study identifies the manifestations of divine beings within SF as differing epistemological categories, locates the modes of marginalisation within Indian popular imagination as altars of alterity, before proceeding to analyse how newer technologies engage with socio-political anxieties in and through SF.
