The best way to start your research into Second World War naval operations is to consult the volumes of the Official History of the Second World War, available in The National Archives Library at Kew and some other specialist libraries. In particular, consult The War at Sea.

Over 3 million U.S. military personnel were sent to Southeast Asia to fight in the Vietnam War. Since the end of the Vietnam War, veterans have reported numerous health effects. Herbicides used in Vietnam, in particular Agent Orange have been associated with a variety of cancers and other long term health problems from Parkinson's disease and type 2 diabetes to heart disease. Prior to 1997 laws safeguarded all service men and women deployed to Vietnam including members of the Blue Navy. Since then, the Department of Veteran Affairs (VA) has established that Vietnam veterans are automatically eligible for disability benefits should they develop any disease associated with Agent Orange exposure, however, veterans who served on deep sea vessels in Vietnam are not included. These "Blue Water Navy" veterans must prove they were exposed to Agent Orange before they can claim benefits. At the request of the VA, the Institute of Medicine (IOM) examined whether Blue Water Navy veterans had similar exposures to Agent Orange as other Vietnam veterans. Blue Water Navy Vietnam Veterans and Agent Orange Exposure comprehensively examines whether Vietnam veterans in the Blue Water Navy experienced exposures to herbicides and their contaminants by reviewing historical reports, relevant legislation, key personnel insights, and chemical analysis to resolve current debate on this issue.

During the Vietnam War, the Military Assistance Command, Vietnam Studies and Observations Group (MACVSOG) was a highly-classified, U.S. joint-service organization that consisted of personnel from Army Special Forces, the Air Force, Navy SEALs, Marine Corps Force Reconnaissance units, and the CIA. This secret organization was committed to action in Southeast Asia even before the major build-up of U.S. forces in 1965 and also fielded a division-sized element of South Vietnamese military personnel, indigenous Montagnards, ethnic Chinese Nungs, and Taiwanese pilots in its varied reconnaissance, naval, air, and agent operations. MACVSOG was without doubt the most unique U.S. unit to participate in the Vietnam War, since its operational mandate authorized its missions to take place "over the fence" in North Vietnam, Laos, and Cambodia, where most other American units were forbidden to go. During its nine-year existence it managed to participate in most of the significant operations and incidents of the conflict. MACVSOG was there during the Gulf of Tonkin incidents, during air operations over North Vietnam, the Tet Offensive, the secret bombing of and ground incursion into Cambodia, Operation Lam Son 719, the Green Beret murder case, the Easter Invasion, the Phoenix Program, and the Son Tay POW Raid. The story of this extraordinary unit has never before been told in full and comes as a timely blueprint for combined-arms, multi-national unconventional warfare in the post-9/11 age. Unlike previous works on the subject, Black Ops, Vietnam is a complete chronological history of the unit drawn from declassified documents, memoirs, and previous works on the subject, which tended to focus only on particular aspects of the unit's operations.

U.S. Navy Intelligence Contribution Key to SE Asia War Effort from 1965-75 Knowing the Enemy, part of the commemorative series The U.S. Navy and the Vietnam War, covers the Navy intelligence establishment's support to the war effort in Southeast Asia from 1965 to 1975. It describes the contribution of naval intelligence to key strategic, operational, and tactical aspects of the war including the involvement of intelligence in the seminal Tonkin Gulf Crisis of 1964 and the Rolling Thunder and Linebacker bombing campaigns; the monitoring of Sino-Soviet bloc military assistance to Hanoi; the operation of the Seventh Fleet's reconnaissance aircraft; the enemy's use of the "neutral" Cambodian port of Sihanoukville and the support to U.S. Navy riverine operations during the Tet Offensive and the SEALORDS campaign in South Vietnam. Special features elaborate on the experiences of reconnaissance plane pilots navigating the dangerous skies of Indochina; intelligence professionals who braved enemy attacks at shore bases in South Vietnam; the perilous mission in Laos of Observation Squadron 67 (VO-67); the secret voyage of nuclear attack submarine Sculpin (SSN-590); and the leadership and heroism of Captain Earl F. Rectanus, Lieutenant Commander Jack Graf, and other naval intelligence professionals who risked, and sometimes lost, their lives in the service of their country during the war. The work is lavishly illustrated with more than 85 photographs and maps, and includes a select list of suggested readings. This publication will be of interest and value to scholars, veterans, and students of the Vietnam War and the Navy's role in that conflict. Related products: Vietnam War resources collection can be found here: <https://bookstore.gpo.gov/catalog/us-military-history/battles-wars/vietnam-war> Other products produced by the U.S. Navy, Naval History and Heritage Command can be found here: <https://bookstore.gpo.gov/agency/902>

This work describes riverine combat during the Vietnam War, emphasizing the operations of the U.S. Navy's River Patrol Force, which conducted Operation Game Warden; the U.S. Army-Navy Mobile Riverine Force, the formation that General William Westmoreland said "saved the Mekong Delta" during the Tet Offensive of 1968; and the Vietnam Navy. An important section details the SEALORDS combined campaign, a determined effort by U.S. Navy, South Vietnamese Navy, and allied ground forces to cut enemy supply lines from Cambodia and disrupt operations at base areas deep in the delta. The author also covers details on the combat vessels, helicopters, weapons, and equipment employed in the Mekong Delta as well as the Vietnamese combatants (on both sides) and American troops who fought to secure Vietnam's waterways. Special features focus on the ubiquitous river patrol boats (PBRs) and the Swift boats (PCFs), river warfare training, Vice Admiral Elmo R. Zumwalt Jr., the Black Ponies aircraft squadron, and Navy SEALs. This publication may be of interest to history scholars, veterans, students in advanced placement history classes, and military enthusiasts given the continuing impact of riverine warfare on U.S. naval and military operations in the 21st century. Special Publicity Tie-In: Commemoration of the 50th anniversary of the Vietnam War (Commemoration dates: 28 May 2012 - 11 November 2025). This is the fifth book in the series, "The U.S. Navy and the Vietnam War." TABLE OF CONTENTS Introduction The First Indochina War The Vietnam Navy River Force and American Advisors The U.S. Navy and the Rivers of Vietnam SEALORDS The End of the Line for U.S. and Vietnamese River Forces Sidebars: The PBR Riverine Warfare Training Battle Fleet of the Mekong Delta High Drama in the Delta Vice Admiral Elmo R. Zumwalt Jr. Black Ponies The Swift Boat Warriors with Green Faces Suggested Reading

The fifteen eyewitness commentaries on U.S. naval operations in Vietnam that form the core of this essay collection represent the first serious attempts to describe the naval side of the war.

The men of the U.S. Navy's brown-water force played a vital but often overlooked role in the Vietnam War. Known for their black berets and limitless courage, they maneuvered their aging, makeshift craft along shallow coastal waters and twisting inland waterways to search out the enemy. In this moving tribute to their contributions and sacrifices, Tom Cutler records their dramatic story as only a participant could. His own Vietnam experience enables him to add a striking human dimension to the account. The terror of firefights along the jungle-lined rivers, the rigors of camp life, and the sudden perils of guerrilla warfare are conveyed with authenticity. At the same time, the author's training as a historian allows him to objectively describe the scope of the navy's operations and evaluate their effectiveness. Winner of the Navy League's Alfred Thayer Mahan Award for Literary Achievement in 1988 when the book was first published, Cutler is credited with having written the definitive history of the brown-water sailors, an effort that has helped readers better understand the nature of U.S. involvement in the war.

Military history looking at aviators during the second half of Vietnam. The stories are told through interviews and journal excerpts of the pilots and aircrew themselves. Great tradey title.
