Is life without parole the perfect compromise to the death penalty? Or is it as ethically fraught as capital punishment? This comprehensive, interdisciplinary anthology treats life without parole as " the new death penalty. " Editors Charles J. Ogletree, Jr. and Austin Sarat bring together original work by prominent scholars in an effort to better understand the growth of life without parole and its social, cultural, political, and legal meanings. What justifies the turn to life imprisonment? How should we understand the fact that this penalty is used disproportionately against racial minorities? What are the most promising avenues for limiting, reforming, or eliminating life without parole sentences in the United States? Contributors explore the structure of life without parole sentences and the impact they have on prisoners, where the penalty fits in modern theories of punishment, and prospects for (as well as challenges to) reform.

" I can think of no authors more qualified to research the complex impact of life sentences than Marc Mauer and Ashley Nellis. They have the expertise to track down the information that all citizens need to know and the skills to translate that research into accessible and powerful prose. " —Heather Ann Thompson, author of the Pulitzer Prize-winning Blood in the Water From the author of the classic Race to Incarcerate, a forceful and necessary argument for eliminating life sentences, including profiles of six people directly impacted by life sentences by formerly incarcerated author Kerry Myers Most Western democracies have few or no people serving life sentences, yet here in the United States more than 200,000 people are sentenced to such prison terms. Marc Mauer and Ashley Nellis of The Sentencing Project argue that there is no practical or moral justification for a sentence longer than twenty years. Harsher sentences have been shown to have little effect on crime rates, since people " age out " of crime—meaning that we ' re spending a fortune on geriatric care for older prisoners who pose little threat to public safety. Extreme punishment for serious crime also has an inflationary effect on sentences across the spectrum, helping to account for severe mandatory minimums and other harsh punishments. A thoughtful and stirring call to action, The Meaning of Life also features moving profiles of a half dozen people affected by life sentences, written by former " lifer " and award-winning writer Kerry Myers. The book will tie in to a campaign spearheaded by The Sentencing Project and offers a much-needed road map to a more humane criminal justice system.

Today there are approximately fifty thousand prisoners in American prisons serving life without parole, having been found guilty of crimes ranging from murder and rape to burglary, carjacking, and drug offences. In The Forgotten Men, criminologist Margaret E. Leigey provides an insightful account of a group of aging inmates imprisoned for at least twenty years, with virtually no chance of release. These men make up one of the most marginalized segments of the contemporary U.S. prison population. Considered too dangerous for rehabilitation, ignored by prison administrators, and overlooked by courts disinclined to review such sentences, these prisoners grow increasingly cut off from family and the outside world. Drawing on in-depth interviews with twenty-five such prisoners, Leigey gives voice to these extremely marginalized inmates and offers a look at how they struggle to cope. She reveals, for instance, that the men believe that permanent incarceration is as inhumane as capital punishment, calling life without parole " the hard death penalty. " Indeed, after serving two decades in prison, some wished that they had received the death penalty instead. Leigey also recounts the ways in which the prisoners attempt to construct meaningful lives inside the bleak environment where they will almost certainly live out their lives. Every state in the union (except Alaska) has the life-without-parole sentencing option, despite its controversial nature and its staggering cost to the taxpayer. The Forgotten Men provides a much-needed analysis of the policies behind life-without-parole sentencing, arguing that such sentences are overused and lead to serious financial and ethical dilemmas.

What does it mean to face a life prison sentence? What have "lifers" learned about life—from having taken a life? Photographer Howard Zehr has interviewed and made portraits of men and women in Pennsylvania prisons who are serving life sentences without possibility of parole. Readers see the prisoners as people, de-mystified. Brief text accompanies each portrait, the voice of each prisoner speaking openly about the crime each has committed, the utter violation of another person each has caused. They speak of loneliness, missing their children growing up, dealing with the vacuum, caught between death and life. A timely book.
