From the Vegas Strip to Wall Street boardrooms and Federal courts, modern corporate titans collide in this explosive true story of how private equity firm Apollo Global Management's thirty-billion-dollar buyout of Caesars Entertainment turned into unprecedented bankruptcy of the gaming empire. In the bestselling tradition of Michael Lewis's *The Big Short* and Ben Mezrich's *Bringing Down the House*, journalists Max Frumes and Sujeet Indap deliver a page-turning account of the spectacular 2015 bankruptcy of America's biggest gaming empire, Caesars Entertainment. Backdropping this thriller-esque narrative are the jokers, kings, and called bluffs at the center of the modern distressed-debt-investing world. Distressed-debt investing, dubbed "vulture investing" in its infancy, is the buying of debt of struggling corporations, institutions, and even cities or countries—and making a windfall profit on a turnaround. In covering the extraordinary Caesars case, *The Caesars Palace Coup* presents a riches-to-rags adventure unlike any other as it appraises the battling billionaires who held the cards in 2008's leveraged buyout. This wild coup's scope spans courtrooms, levels of government, academic halls, and ultimately involves an entire corrupt system of liar's poker. Readers will discover just how rivetingly sophisticated—and underhanded—the high-stakes finance battleground has become. Authors Frumes and Indap, experienced business journalists, illuminate the major players and businesspeople at the tipping points of almost every major vulture's turnaround in recent history. *The Caesars Palace Coup* reveals the cut-throat, multilevel competition enacted by powerful investors used to getting their own way. And goes one step further to consider the devastating, true impact of the upheaval wrought by their actions. It's a treacherous game. Roll the dice.

Learn why some drug discovery and development efforts succeed . . . and others fail Written by international experts in drug discovery and development, this book sets forth carefully researched and analyzed case studies of both successful and failed drug discovery and development efforts, enabling medicinal chemists and pharmaceutical scientists to learn from actual examples. Each case study focuses on a particular drug and therapeutic target, guiding readers through the drug discovery and development process, including drug design rationale, structure-activity relationships, pharmacology, drug metabolism, biology, and clinical studies. Case Studies in Modern Drug Discovery and Development begins with an introductory chapter that puts into perspective the underlying issues facing the pharmaceutical industry and provides insight into future research opportunities. Next, there are fourteen detailed case studies, examining: All phases of drug discovery and development from initial idea to commercialization Some of today's most important and life-saving medications Drugs designed for different therapeutic areas such as cardiovascular disease, infection, inflammation, cancer, metabolic syndrome, and allergies Examples of prodrugs and inhaled drugs Reasons why certain drugs failed to advance to market despite major research investments Each chapter ends with a list of references leading to the primary literature. There are also plenty of tables and illustrations to help readers fully understand key concepts, processes, and technologies.
