Provisions for the Seekers: A Manual of Prophetic Hadiths with Commentary. The Messenger of God, Muhammad--the blessings and peace of Allah be upon him, was given exceptional oratorical skills. His words were eloquent, comprehensive, and simple, conveying libraries of wisdoms and truths. The Messenger--the blessings and peace of Alalh be upon him--himself said, "I have been sent with the jawami al-kalim" (Bukhari)--that is, pithy language that exp.

The Prophet said, "Actions are only according to intentions, and a person receives only what he has intended.

Winner of Australia's richest literary award, No Friend but the Mountains is Kurdish-Iranian journalist and refugee Behrouz Boochani's account of his detainment on Australia's notorious Manus Island prison. Composed entirely by text message, this work represents the harrowing experience of stateless and imprisoned refugees and migrants around the world. In 2013, Kurdish-Iranian journalist Behrouz Boochani was illegally detained on Manus Island, a refugee detention centre off the coast of Australia. He has been there ever since. This book is the result. Laboriously tapped out on a mobile phone and translated from the Farsi. It is a voice of witness, an act of survival. A lyric first-hand account. A cry of resistance. A vivid portrait of five years of incarceration and exile. Winner of the Victorian Prize for Literature, No Friend but the Mountains is an extraordinary account — one that is disturbingly representative of the experience of the many stateless and imprisoned refugees and migrants around the world. "Our government jailed his body, but his soul remained that of a free man." — From the Foreword by Man Booker Prize-winning author Richard Flanagan

This publication highlights key issues and principles to be considered in the drafting, adoption and implementation of mental health legislation and best practice in mental health services. It contains examples of diverse experiences and practices, as well as extracts of laws and other legal documents from a range of different countries, and a checklist of key policy components. Three main elements of effective mental health legislation are identified, relating to context, content and process.

The study reported in this volume grew out of some theoretical work, one phase of which bore specifically on the behavior of individuals in social movements that made specific (and unfulfilled) prophecies. We had been forced to depend chiefly on historical records to judge the adequacy of our theoretical ideas until we by chance discovered the social movement that we report in this book. At the time we learned of it, the movement was in mid-career but the prophecy about which it was centered had not yet been disconfirmed. We were understandably eager to undertake a study that could test our theoretical ideas under natural conditions. That we were able to do this study was in great measure due to the support obtained through the Laboratory for Research in Social Relations of the University of Minnesota. This study is a project of the Laboratory and was carried out while we were all members of its staff. We should also like to acknowledge the help we received through a grant-in-aid from the Ford Foundation to one of the authors, a grant that made preliminary exploration of the field situation possible.

In The End of Asylum, three experts in immigration law offer a comprehensive examination of the rise and demise of the US asylum system, showing how the Trump administration has put forth regulations, policies, and practices all designed to end opportunities for asylum seekers and what we can do about it.

International Criminal Law has undergone significant recent changes. Transnational Fugitive Offenders reflects the dynamic nature of the subject & keeps readers on the cutting edge of new developments. An ever-increasing number & variety of international agreements & cases has expanded extradition law. The jurisprudence relating to alternative means of rendition has also evolved in different ways in different jurisdictions. Most notably, however, the remit of the subject as a whole has expanded. The concept of international criminal law now has to embrace crimes that occur in no single place, cross-border financial crimes where vast sums of money exist solely in cyberspace & which have connections with financial institutions in several countries. The international community has also established supra-national criminal courts to deal with the aftermath of the wars in the former Yugoslavia & Rwanda. The future will likely bring further changes as well. The permanent International Criminal Court, originally proposed by the International Law Commission, if established by the international community, would, as matters stand in 1998, have jurisdiction over genocide, crimes against humanity & war crimes. The ultimate result may at last be the availability of overarching guidance as to the remit & scope of international criminal law. Those studying extradition law, and/or working with transnational fugitive offenders in any capacity, will find Transnational Fugitive Offenders an important, thought-provoking work on a very dynamic subject.

Civil Society Organizations (CSOs) can make a vital contribution to public health and health systems, but harnessing their potential is complex in a Europe where government-CSO relations vary so profoundly. This study is intended to outline some of the challenges and assist policy-makers in furthering their understanding of the part CSOs can play in tandem and alongside government. To this end it analyzes existing evidence and draws on a set of seven thematic chapters and six mini case studies. They examine experiences from Austria, Bosnia-Herzegovina, Belgium, Cyprus, Finland, Germany, Malta, the Netherlands, Poland, the Russian Federation, Slovenia, Turkey and the European Union and make use of a single assessment framework to understand the diverse contexts in which CSOs operate. The evidence shows that CSOs are ubiquitous, varied and beneficial, and the topics covered in this study reflect such diversity of aims and means: anti-tobacco advocacy, food banks, refugee health, HIV/AIDS prevention and cure, and social partnership. CSOs make a substantial contribution to public health and health systems with regards to policy development, service delivery and governance. This includes evidence provision, advocacy, mobilization, consensus building, provision of medical services and of services related to the social determinants of health, standard setting, self-regulation and fostering social partnership. However, in order to engage successfully with CSOs, governments do need to make use of adequate tools and create contexts conducive to collaboration. To guide policy-makers working with CSOs through such complications, and help avoid some potential pitfalls, the book outlines a practical framework for such collaboration. This suggests identifying key CSOs in a given area; clarifying why there should be engagement with civil society; being realistic as to what CSOs can or will achieve; and an understanding of how CSOs can be helped to deliver.
