guide. The twentieth edition has been thoroughly updated by a new team of 'teachers', integrating clinical material with the latest scientific developments that underpin patient care. Each chapter is highly structured, with learning objectives, definitions, aetiology, clinical features, investigations, treatments, case histories and key point summaries and additional reading where appropriate. New themes for this edition include 'professionalism' and 'global health' and information specific to both areas is threaded throughout the text.

postnatal care (physical and emotional wellbeing), diseases, disorder and complications, emergencies and the neonate. A chapter is devoted to the increasingly important issues of law and ethics in practice. Detailed coverage of all the key elements of midwifery by a team of experienced lecturers and practitioners combined with inviting 4-colour layout and plenty of colour photographs make this book the one reference any trainee, returning or practising midwife will need.
