Updated throughout with new vignettes, boxes, cases, and more, this classic text blends the most recent sales management research with real-life "best practices" of leading sales organizations. The text focuses on the importance of employing different sales strategies for different consumer groups, and on integrating corporate, business, marketing, and sales strategies. It equips students with a strong foundation in current trends and issues, and identifies the skill sets needed for the 21st century.

Marketing: Principles and Perspectives, 5e is a cutting edge text. In the first four editions, we demonstrated this leading coverage with our strong integration of Integrated Marketing Communication, cross-functional teams, and integration of the Internet throughout. The authors not only talk about what marketing is, but prepare students to be marketers by involving them in interactive exercises which strengthen decision making skills. Marketing, 5e offers the latest coverage and quality supplements, but is still approximately \$20 less than most principles of marketing competitors. The perspectives approach is present in the fifth edition; however, the over-riding theme concentrates on building customer equity.

"A must read for every aspiring entrepreneur. A clear guide to effective and realistic selling for those with a "big idea" who wish to achieve success for their products and to avoid costly and ineffective pitfalls in their quest. The framework balances entrepreneurs' creativity with a foundation of solid business principles." --Jim McCann, Founder, 1-800-FLOWERS

The Oxford Handbook of Strategic Sales and Sales Management is an unrivalled overview by leading academics in the field of sales and marketing management. Sales theory is experiencing a renaissance driven by a number of factors, including building profitable relationships, creating/delivering brand value, strategic customer management, sales and marketing relationships, global selling, and the change from transactional to customer relationship marketing. Escalating sales and selling costs require organisations to be more focused on results and highlight the shifting of resources from marketing to sales. Further the growth in customer power now requires a strategic sales response, and not just a tactical one. The positioning of sales within the organisation, the sales function and sales management are all discussed. The Handbook is not a general sales management text about managing a sales force, but will fill a gap in the existing literature through consolidating the current academic research in the sales area. The Handbook is structured around four key topics. The first section explores the strategic positioning of the sales function within the modern organisation. The second considers sales management and recent developments. The third section examines the sales relationship with the customer and highlights how sales is responding to the modern environment. Finally, the fourth section reviews the internal composition of sales within the organisation. The Handbook will provide a comprehensive introduction to the latest research in sales management, and is suitable for academics, professionals, and those taking professional qualifications in sales and marketing.
