Musical performance has been a part of television since the introduction of the medium. The styles and production requirements of music and of television have long influenced the other. Murray Forman gives the history of this interaction, going back to the early years of television, before the broadcast networks, up through the late fifties. He explores the full range of popular music from show tunes to Latin in a wide variety of television programs, and shows how the standards of presentation and performance developed.

In this book, Jack Banks examines the historical development of music video as a commodity and analyzes the existing structures within which music video is produced, distributed, and exhibited on its premier music channel, MTV.)In August 1981, Music Televisionnow popularly known as MTVwas launched. Within a matter of years it revitalized a struggling record industry; made the careers of leading pop stars like Madonna, Boy George, Cyndi Lauper, and Duran Duran; infiltrated traditional network television and the movie industry; revolutionized the advertising industry; and stimulated purchases in several markets, most notably fashion apparel. The reach of MTV has proven long and profitable. In this book, Jack Banks examines the historical development of music video as a commodity and analyzes the existing structures within which music video is produced, distributed, and exhibited on its premier music channel, MTV. Who controls MTV? What part do record companies play in the financing and production of music video? How do the power brokers in the business affect the ideological content of music video? Given the tight sphere of influence within the music industry, what are the future trends for music video and for artistic freedom of expression? Banks tackles these questions in an intelligent, lively, and sophisticated investigation into one of the most influential media enterprises of our society. }

Reality first appeared in the late 1980s—in the sense not of real life but rather of the TV entertainment genre inaugurated by shows such as Cops and America’s Most Wanted; the daytime gabfests of Geraldo, Oprah, and Donahue; and the tabloid news of A Current Affair. In a bracing work of cultural criticism, Eric Harvey argues that reality TV emerged in dialog with another kind of entertainment that served as its foil while borrowing its techniques: gangsta rap. Or, as legendary performers Ice Cube and Ice-T called it, “reality rap.” Reality rap and reality TV were components of a cultural revolution that redefined popular entertainment as a truth-telling medium. Reality entertainment borrowed journalistic tropes but was undiluted by the caveats and context that journalism demanded. While N.W.A.’s “Fuck the Police” countered Cops’ vision of Black lives in America, the reality rappers who emerged in that group’s wake, such as Snoop Doggy Dogg and Tupac Shakur, embraced reality’s visceral tabloid sensationalism, using the media’s obsession with Black criminality to collapse the distinction between image and truth. Reality TV and reality rap nurtured the world we live in now, where politics and basic facts don’t feel real until they have been translated into mass-mediated entertainment.
