If you are a business user or data professional, this book will give you a solid grounding in the use of TIBCO Spotfire. This book assumes no prior knowledge of Spotfire or even basic data and visualization concepts.

Modern businesses are on the lookout for ventures that boost their profits and marketability. Certain new and innovative technological advances can help enterprises accomplish their ambitious goals while providing detailed information to assess all aspects of the business. *Global Virtual Enterprises in Cloud Computing Environments* is a collection of innovative studies on business processes, procedures, methods, strategy, management thinking, and utilization of technology in cloud computing environments. While highlighting topics including international business strategy, virtual reality, and intellectual capital, this book is ideally designed for corporate executives, research scholars, and students pursuing courses in the areas of management and big data applications seeking current research on effective open innovation strategies in global business.

Authoritative advice on creating and running a successful API program. The number of articles, books, and documents available on the topic of Application Programming Interfaces (APIs) might lead you to believe the topic has been well researched and well documented. But in fact, confusion abounds, especially about the best ways to create and maintain a successful API program. This book addresses that confusion. It encapsulates years of practical experience on how to make the right decisions at the right times when planning, designing, developing, and marketing APIs. It's your go-to resource when you want to: Understand how to develop your API program's business case Discover how to best engage your API consumer audience Learn the best ways to design, build, test, and deploy APIs regardless of technology Improve the chances of success of your API program over the long haul Technology will come and go, but the best practices for building an API program are here to stay. Make your journey through the world of APIs a successful one with this book as your experienced guide. Petracek provides an excellent guide on how corporations should leverage an API based service ecosystem to deliver amazing digital customer experiences. -T.M. Ravi, Managing Director, The Hive Nelson has taken the complex, technical, arcane, but critical topic of application programming interfaces (APIs) and explained them in a manner that allows the reader and Information Technology practitioner to understand. -Salil Kulkarni, EVP & Interim Chief Information Officer, Caesar's Entertainment This book takes you through everything you need to think about and work through to build an API competency. Each chapter sets out concrete actions for making your program state-of-the-art, and I highly recommend it to anyone involved in that effort. - Maureen Fleming, Program Vice President & Analyst, IDC

Provides you with the tools that show you how to effectively manage your data. From SAP Data Services to various solutions like SAP Power Designer, this title helps you learn what the different solutions are and how they work together. It also offers detailed information on SAP's different EIM solutions to learn what they can do for you.

This book is aimed at both new developers as well as experienced developers. If you are a new SAP BusinessObjects Universe developer who is looking for a step-by-step guide supported with real-life examples and illustrated diagrams, then this book is for you. If you are a seasoned BusinessObjects Universe developer who is looking for a fast way to map your old experience in Universe designer to the newer Information Design Tool, then this book is for you as well.

Create innovative informatics solutions with TIBCO Spotfire Key Features Get to grips with a variety of TIBCO Spotfire features to create professional applications Use different data and visualization techniques to build interactive analyses. Simplify BI processes and understand data analysis and visualization Book Description The need for agile business intelligence (BI) is growing daily, and TIBCO Spotfire® combines self-service features with essential enterprise governance and scaling capabilities to provide best-practice analytics solutions. Spotfire is easy and intuitive to use and is a rewarding environment for all BI users and analytics developers. Starting with data and visualization concepts, this book takes you on a journey through increasingly advanced topics to help you work toward becoming a professional analytics solution provider. Examples of analyzing real-world data are used to illustrate how to work with Spotfire. Once you've covered the AI-driven recommendations engine, you'll move on to understanding Spotfire's rich suite of visualizations and when, why and how you should use each of them. In later chapters, you'll work with location analytics, advanced analytics using TIBCO Enterprise Runtime for R®, how to decide whether to use in-database or in-memory analytics, and how to work with streaming (live) data in Spotfire. You'll also explore key product integrations that significantly enhance Spotfire's capabilities. This book will enable you to exploit the advantages of the Spotfire server topology and learn how to make practical use of scheduling and routing rules. By the end of this book, you will have learned how to build and use powerful analytics dashboards and applications, perform spatial analytics, and be able to administer your Spotfire environment efficiently What you will learn Work with Spotfire on its web, Cloud, PC, Mac and mobile clients Deploy Spotfire's suite of visualization types effectively and intelligently Build user-friendly analytics frameworks and analytics applications Explore Spotfire's predictive analytics capabilities Use Spotfire's location analytics capabilities to create interactive spatial analyses Write IronPython scripts with the Spotfire API Learn the different ways Spotfire can be deployed and administered Who this book is for If you are a business intelligence or data professional, this book will give you a solid grounding in the use of TIBCO Spotfire. This book requires no prior knowledge of Spotfire or any basic data and visualization concepts.

SAP BusinessObjects Dashboards is a leading Business Intelligence and reporting tool that provides you with a real-time understanding of your business with agile visualizations. Starting with an introduction to Dashboards and its benefits, the book slowly moves on to explain the dashboard creation process. After this, you will learn how to add charts, single-value components, maps, selectors, and other third-party plugins to the existing dashboards. Furthermore, it shares many best practices and will also help you to connect your dashboard to real data by establishing a data connection to a data source. You can also explore more about mobile BI and learn how to create dashboards for mobile devices. By the end of the book, you will be able to prepare, plan, and design interactive dashboards based on your
