The datasets (vol.2 - 3) summarize the results of the fourth round of the HFPS-HH—including 2,878 households in both urban and rural areas in all regions of Ethiopia—implemented between July 27 and August 14, 2020.

The global health community is broadly in agreement that achievement of the health-related Sustainable Development Goals (SDGs) hinges upon both an escalation of the financial resources dedicated to primary health care (PHC) and a more effective use of those resources: more

# File Type PDF Tracking Trends In Ethiopia S Civil Society Tec Policy

money, better spent. This book introduces and explicates the end-to-end resource tracking and management (RTM) framework, which includes five components that determine effective and efficient financing for PHC: resource mobilization, allocation, utilization, productivity, and targeting. In addition, this book compiles detailed results from the most recent RTM-based resource tracking efforts for PHC in selected countries. This is to demonstrate how the RTM framework can be used to bring a set of separate resource tracking efforts at different stages of flow of funds into a comprehensive process with an end-to-end 'storyline'. In order to build a functional PHC system that addresses access, quality, and equity issues, this book highlights the key (public) financing issues that researchers, technical advisors, and policy makers would need to address in addition to more resources.

Ethiopia has experienced impressive agricultural growth and poverty reduction, stemming in part from substantial public investments in agriculture. Yet, the agriculture sector now faces increasing land and water constraints along with other challenges to growth. Ethiopia's Agrifood System: Past Trends, Present Challenges, and Future Scenarios presents a forward-looking analysis of Ethiopia's agrifood system in the context of a rapidly changing economy. Growth in the agriculture sector remains essential to continued poverty reduction in Ethiopia

## File Type PDF Tracking Trends In Ethiopia S Civil Society Tecs Policy

and will depend on sustained investment in the agrifood system, especially private sector investment. Many of the policies for a successful agricultural and rural development strategy for Ethiopia are relevant for other African countries, as well. Ethiopia's Agrifood System should be a valuable resource for policymakers, development specialists, and others concerned with economic development in Africa south of the Sahara.

"The heated Malthusian-Bosrupian debates still rage over consequences of high population growth, rapid urbanization, dense rural populations and young age structures in the face of drought, poverty, food insecurity, environmental degradation, climate change, instability and the global economic crisis. However, while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub-Saharan Africa are commonplace, they are often misleading and belie the socio-cultural change that is occurring among a vanguard of more educated youth. Even within Ethiopia, the second largest country at the Crossroads of Africa and the Middle East, different narratives emerge from analysis of longitudinal, micro-level analysis as to how demographic change and responses are occurring, some more rapidly than others. The book compares Ethiopia with other Africa countries, and demonstrates the uniqueness of an African-type

# File Type PDF Tracking Trends In Ethiopia S Civil Society Tec Policy

demographic transition: a combination of poverty-related negative factors (unemployment, disease, food insecurity) along with positive education, health and higher age-of-marriage trends that are pushing this ruggedly rural and land-locked population to accelerate the demographic transition and stay on track to meet most of the MDGs. This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition, trying to unravel some of the complexities in this vulnerable Horn of Africa country: A slowly declining population growth rates with rapidly declining child mortality, very high chronic under-nutrition, already low urban fertility but still very high rural fertility; and high population-resource pressure along with rapidly growing small urban places”

This volume is a collection of selected empirical studies on determinants of economic growth and development in Ethiopia. The core argument for editing this book is to provide an up-to-date picture of the state and patterns of growth and development in Ethiopia. Ethiopia has been under focus in the past due to draughts, war, famine, development changes and the effects of global economic crisis in the country. A main contribution of this volume is that it helps identify selected important determinants of growth and development in Ethiopia

# File Type PDF Tracking Trends In Ethiopia S Civil Society Tec Policy

and provides an estimation of their effects using up-to-date data, modelling and methods. Taken together the studies provide a comprehensive picture of the state of growth and development, their measurements, causal relationships and evaluation of efficient policies and practices in achieving progress in Ethiopia. The issues covered represent major challenges to the government and development organizations who are aiming at achieving higher growth and alleviating poverty in the country. The studies cover transition from rural agriculture to urban industry and the development of services.

The COVID-19 pandemic underscores the critical need for detailed, timely information on its evolving economic impacts, particularly for Sub-Saharan Africa (SSA) where data availability and lack of generalizable nowcasting methodologies limit efforts for coordinated policy responses. This paper presents a suite of high frequency and granular country-level indicator tools that can be used to nowcast GDP and track changes in economic activity for countries in SSA. We make two main contributions: (1) demonstration of the predictive power of alternative data variables such as Google search trends and mobile payments, and (2) implementation of two types of modelling methodologies, machine learning and parametric factor models, that have flexibility to incorporate mixed-frequency data variables. We

# File Type PDF Tracking Trends In Ethiopia S Civil Society Tec Policy

present nowcast results for 2019Q4 and 2020Q1 GDP for Kenya, Nigeria, South Africa, Uganda, and Ghana, and argue that our factor model methodology can be generalized to nowcast and forecast GDP for other SSA countries with limited data availability and shorter timeframes.

Agriculture's vast potential to improve nutrition is just beginning to be tapped. New ideas, research, and initiatives developed over the past decade have created an opportunity for reimagining and redesigning agricultural and food systems for the benefit of nutrition. To support this transformation, the book reviews the latest findings, results from on-the-ground programs and interventions, and recent policy experiences from countries around the world that are bringing the agriculture and nutrition sectors closer together. Drawing on IFPRI's own work and that of the growing agriculture-nutrition community, this book strengthens the evidence base for, and expands our vision of, how agriculture can contribute to nutrition. Chapters cover an array of issues that link agriculture and nutrition, including food value chains, nutrition-sensitive programs and policies, government policies, and private sector investments. By highlighting both achievements and setbacks, Agriculture for Improved Nutrition seeks to inspire those who want to scale up successes that can transform food systems and improve the nutrition of billions of

people.

The struggle over land has been the central issue in Zimbabwe ever since white settlers began to carve out large farms over a century ago. Their monopolisation of the better-watered half of the land was the focus of the African war of liberation war, and was partially modified following Independence in 1980. A dramatic further episode in this history was launched at the start of the last decade with the occupation of many farms by groups of African veterans of the liberation struggle and their supporters, which was then institutionalised by legislation to take over most of the large commercial farms for sub-division. Sustained fieldwork over the intervening years, by teams of scholars and experts, and by individual researchers is now generating an array of evidence-based findings of the outcomes: how land was acquired and disposed of; how it has been used; how far new farmers have carved out new livelihoods and viable new communities; the major political and economic problems they and other stakeholders such as former farm-workers, commercial farmers, and the overall rural society now face. This book will be an essential starting place for analysts, policy-makers, historians and activists seeking to understand what has happened and to spotlight the key issues for the next decade. This book was published as a special issue

of the Journal of Peasant Studies.

The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Several studies have investigated the impetus and implications behind large-scale land acquisitions/deals at the global level; however, intranational factors within communities and societies have not received much attention from researchers. The Handbook of Research on In-Country Determinants and Implications of Foreign Land Acquisitions examines the economic, sociological, and environmental issues surrounding land transactions and the impact these deals may have on local households and communities. Focusing on international issues as well as domestic concerns, this publication is a useful reference for policymakers, academics, researchers, and advanced-level students in
